

Instructions for wear checks of play equipment

The equipment must be checked for correct operation, especially the points listed below:

Proof of maintenance

Playground

Date of installation

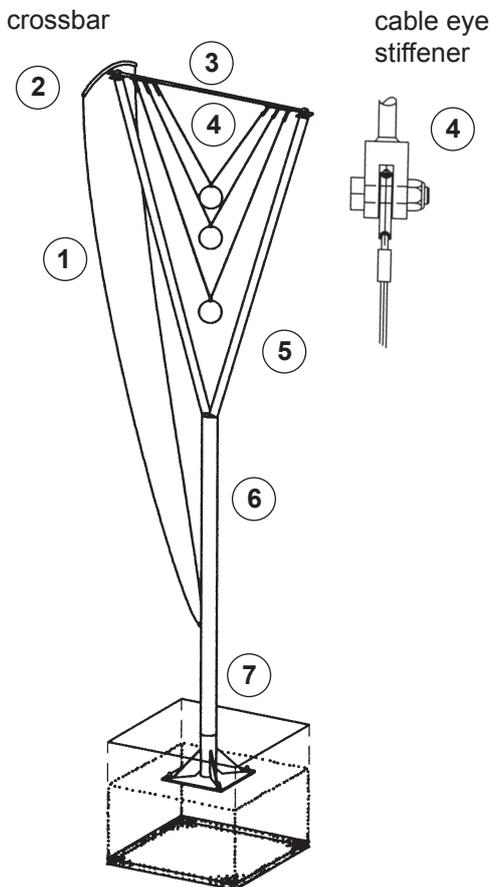

Checks depend on the type of equipment. Any equipment with moving parts must be checked at least twice a year, static equipment at least once a year.

Intervals for maintenance work and checks generally depend on

- location
- kind of use
- frequency of use
- possible vandalism

For more details see also "General instructions for maintenance of playgrounds".

Three-Frequency Pendulum
Order No. 10.12100

* Mechanism

1. Check that ropes are in proper condition.
2. Check that pendulum rods sit firmly on the crossbar.
3. Check that the crossbar moves freely.
4. Check that the cable eye stiffeners can be moved freely in the fork – if the bolt is too tight, the cables may wear from abrasion.
5. Check that the balls are attached properly.

Stainless steel

6. Clean with stainless steel spray (www.kim-tec.de) using a clean cloth.

Structural stability

7. Check anchoring to the ground every 12 months.

* Note

Because of the equipment height, a double ladder or similar is needed to examine the bolts of the mechanism. Longer maintenance intervals are at your own discretion.

Special notes, e.g. for repairs

Repair not carried out, it is still possible to play on equipment

Repair not carried out, equipment is taken out of action

All work carried out, everything is in order

Maintenance carried out by:

..... Date
