Play value

The Timber House is a Play House on stilts, with basic furnishings like a table and benches. It offers all the play possibilities of the Play House but has a higher play value due to the second play level. The lower play area invites den-building and adventure games but can also be cellar or stable. The stair is a stimulus for activity and can be an activity in itself, climbing, stepping, jumping and hiding.

Fundamental characteristics

- Child proportions according to ergonomic requirements
- Appealing design
- Natural wooden surface which appeals to the senses
- Incentive for playing: veranda, furniture, stair
- Movement: climbing up and around

Recommended for

- Kindergarten children
- Schoolchildren
- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

corresponding to a fall height of ≤ 0.60 m
(please refer to price list for more
detailed information)

Foundations
Order No. L4.10300 / L4.10310

4 items 50 x 50 x 40 cm
Excavation depth 60 cm
1 item 30 x 70 x 20 cm
Excavation depth 40 cm

Order No. L4.10400 / L4.10410

4 items 50 x 50 x 40 cm
Excavation depth 60 cm
1 item 30 x 70 x 20 cm
Excavation depth 40 cm

Attention:

**Exact measurements may vary;
for all installation dimensions refer
to current assembly instructions.**
Technical changes reserved.

Technical information

Equipment made of non-impregnated
mountain larch

Core-free

Sawn-timbers core-free, thus decreasing
occurrences of cracking and undesired
changes in shape

Claddings

Claddings made of mountain larch
(4 – 5 cm). Peeled white by hand,
natural tree surface remains tangible
and perceptible

Ground anchor

All parts used for anchoring to the
ground are made of hot-dip galvanised
steel or stainless steel

**For more detailed explanation of the
quality characteristics see price list.**

Floor of 25 mm tongue and groove
boards

Steps of stairs made of hardwood,
32 mm
