

Play value

In the Arm Game the alternating forwards and backwards movement of the handles in their guides can be compared to the movements of the poles in cross-country skiing and in Nordic walking, except that here it takes place on the same spot. Varying the pressure means the handles slide either easier or harder.

Fundamental characteristics

- School children
- Young people
- Adults
- Older people
- Supervised play areas such as schools, after-school programmes or similar
- Public play areas without a supervision, such as playgrounds, parks or similar

Arm Game

Technical information

Equipment made of non-impregnated mountain larch

Core-free

Sawn-timbers core-free, thus decreasing occurrences of cracking and undesired changes in shape

Adjustable

Adjustable two-piece bolt connection, easy to maintain, no projecting threads

HPL ground anchor

Foundation anchor made of phenol resin paper-based laminates

For more detailed explanation of the quality characteristics see price list.

Sandwich construction frame, oiled, non-positive fitting

Handle bar made of stainless steel

Handles made of polyamide

Dimensions

(small deviations possible)

Height	1.05 m
Width	1.50 m
Depth	0.80 m
Weight	approx. 180 kg

Components

- 4 Support posts with foundation anchors
- 2 Handle bars with handles

Installation information

Surfacing requirements
no requirements

Foundations
2 items 60 x 120 x 40 cm
Excavation 60 cm

Attention:
Exact measurements may vary;
for all installation dimensions refer
to current assembly instructions.
Technical changes reserved.

Safety

This equipment is not playground equipment within the scope of DIN EN 1176 and therefore is also not subject to the requirements of this standard. Nevertheless, it is complied with where appropriate.
